

Computability

Vegliante Amerigo

Prof. Baldan Paolo

2026/2027

Index

1. Introduction	1
2. Algorithms and Existence of Non-Computable Functions	2
3. URM Computability	3
4. Decidable Predicates	4
5. Computability on Other Domains	5
6. Generation of Computable Functions	6
7. Other Approaches to Computability	7
8. Primitive Recursive Functions	8
9. Enumeration of Programs	9
10. Cantor Diagonalization Technique	10
11. Parametrization Theorem	11
12. Universal Function	12
13. Recursive Sets	13
14. Rice Theorem	14
15. Recursively Enumerable Sets	15
16. Rice-Shapiro Theorem	16
17. First Recursion Theorem	17
18. Second Recursion Theorem	18

1. Introduction

2. Algorithms and Existence of Non-Computable Functions

3. URM Computability

4. Decidable Predicates

5. Computability on Other Domains

6. Generation of Computable Functions

7. Other Approaches to Computability

8. Primitive Recursive Functions

9. Enumeration of Programs

10. Cantor Diagonalization Technique
